

React: Life Cycle Methods

React – Box Animation

The following exercise contains the following subjects:

- Class component
- Life Cycle Methods

Instructions

1. We want to create a simple app: a box that slides into the screen 1 sec after the page loads and disappears from the DOM after 4 seconds.
2. We also want to be able to add 3 such boxes of different sizes.

[Here](#) is an example

Tip:

checkout CSS property animation, and keyframes
